PROFILE

Results-driven data analyst with experience in collecting, processing, and analyzing large datasets. Proficient in utilizing statistical methods, data visualization tools, and programming languages such as Python, SQL, Excel, and Tableau. Adept at translating data into actionable insights for business improvement. Proven ability to communicate complex technical findings to non-technical stakeholders.

WORK EXPERIENCE

DATA ANALYST/DIGITAL MARKETER

JDC Remodeling

Aug 2020- Present

- At JDC Remodeling I led the charge into helping them to collect data through Quick books and Their Estimating Software (Rapid Home Estimator). I then built the process for taking that Data and with the help of Excel and Tableau was able to visualize that data in a way that help JDC increase profits.
- Developed a data ingestion process to automate the transfer of data from multiple sources into a single database, resulting in a reduction in manual data entry
- Utilized data visualization tools to create interactive graphical representations of financial data
- Managed and monitored social media accounts to ensure a positive brand image and respond to customer inquiries
